Amputates Arm of Little Girl Caught in Power Machine—Dog Innocent Cause.

Figure 5, D. Oct. 4.—Mrs. J. B. Gorman of Harding county, was forced to decide whether to amputate the arm of her little daughter, or allow the child to suffer with her arm crushed in the machinery of a power washing machine until she could go a long distance for help.

She decided that as the arm was so badly mangled that it would have to be cut off, she would perform the operation. With the implements at hand she cut the suffering child loose, and afterward sending a team ready, took her to the nearest physician, where the injured stump was properly cared for.

The child had been left alone in a room where a power washing machine was being used, and becoming frightened, she attempted to go around the machine and her arm was caught in the belt.

## NO "MARBLE BRIDE," DECLARES ACTRESS

Cecil Cunningham.

Jean Haves, song writer, has sued Cecil Cunningham, his bride of a few months, for divorce, charging she is a "marble bride."

"I may be a 'marble bride,' but it's his fault," Mrs. Haves said. "But I must. I'm Irish. And I'm a big girl. There's lots of time. So when I get good again it means a lot to think about. The one great big trouble with Mr. Haves is that he is lazy. And I just got tired of supporting him."

## October Finds This Store Prepared

### Store Editorials

#### The Margin of Safety

The engineer figures "the load" his building has to bear and allows some certain number of pounds in excess to make it safe.

In assembling the immense stocks that go into the making of this store that same sort of "margin" is heeded to make merchandising safe.

And now that there comes the day when women and men will scrutinize more closely than ever, every purchase they make—it is well to keep in mind always that—

there is a price below which no article can be bought and retain its margin of safety—QUALITY.

This margin in merchandise cannot be determined by price. It is set by quality. This safety is the fundamental principle in this store's stocks.

We believe that the ultimate success of a store depends upon the confidence of the public in receiving good value and good service.

One of the first principles involved in a progressive business is that the advertiser must have faith in the trustworthiness of his goods—advertise them exactly as they are and exactly as the purchaser will find them.

Everything offered here is genuine in character, sincere in its expression and purpose of service, and as low in price as is consistently possible always.
